

Is your cat slowing down?

Complete this checklist to find out if they could benefit from a joint supplement like Antinol[®] Plus.

Joint and mobility problems are common issues that can affect all cats, especially as they age. When cats experience strain on their joints, this can lead to pain and discomfort. The good news is you can help support your cat's joint health and mobility. Cats are good at hiding their pain, so knowing what to look for and being proactive can help your cat maintain an active and healthy life.

Think about your cat's activity in the past week.

Check all of the signs that you've observed in your cat:

☐ rarely
 ☐ sometimes
 ☐ daily

Difficulty or Avoiding Jumping

☐ rarely
 ☐ sometimes
