

Is your dog slowing down?

Complete this checklist to find out if they could benefit from a joint supplement like Antinol[®] Plus.

Joint pain is a common issue that can affect dogs of all ages, breeds, and sizes. Whether due to aging, high levels of physical activity, or excessive weight, many dogs experience strain on their joints that can lead to pain and discomfort. The good news is you don't have to wait. Knowing what to look for and being proactive can help your dog maintain an active and healthy life.

Think about your dog's activity in the past week.

Check all of the signs that you've observed in your dog:

☐
☐
☐

rarely sometimes daily

Limping after exercise
