Discover Antinol® Plus

Pure. Potent. Proven.

Proud to carry a Quality Seal
from the National Animal
Supplement Council®

The NASC Quality Seal identifies products
compliant with the following criteria:

- Quality control manuals in place
- Adverse event reporting system in place
- Stringent labeling guidelines
- Submit to random product testing by an independent lab
- Participate in mandatory annual trainings facilitated by NASC
- Pass a biennial audit

The Antinol® Plus Difference

Clinically Proven Joint & Mobility Support

Antinol® Plus' synergistic formula is packed with beneficial fatty acids and potent antioxidants that benefit younger and older dogs by addressing leg, knee, and hip issues associated with aging or overuse.

Powered by Green-Lipped Mussel Oil

Unlike other products that are made of green-lipped mussel powder, the oil in Antinol® Plus is more concentrated and delivered in a bioavailable form. Powder can in some cases be a waste product of the oil production process. If a product is in chew form, it's likely made of green-lipped mussel powder.

Pure Quality

Natural and sustainably sourced green-lipped mussel oil from the pristine waters of the Marlborough Sounds New Zealand, and krill from the nutrient-dense waters around Antarctica. Every batch is tested for purity, and free from harmful levels of pathogens and heavy metals.

Potent Ingredients

Green-lipped mussel oil and Antarctic krill work synergistically. When combined, they deliver a powerful one-two punch of potent antioxidants and beneficial omega-3 fatty acids in a highly bioavailable form.

Clinically Proven Formula

Clinically proven to be effective by 2 double-blind controlled clinical trials. Proven to enhance mobility in as little as 30-days, which is 2-weeks sooner than a leading competitor, and support a healthy inflammatory response, which is crucial for overall health.

Supports a Healthy Inflammatory Response

A healthy inflammatory response promotes a healthy healing process, which allows for faster recovery from injury, surgery, or issues associated with increased activity.

Works Better and Faster

Antinol® Plus is clinically proven to work better and faster than glucosamine and chondroitin, one of the most common joint supplements for dogs. It also resulted in higher rates of mobility.

INITIAL 4 WEEKS

 Up to 44 lbs.	 2 soft gels daily
 45+ lbs.	 4 soft gels daily

MAINTENANCE

 Up to 44 lbs.	 1-2 soft gels daily
 45+ lbs.	 2-4 soft gels daily
