

Antinol[®]+

Enhanced Daily Joint
& Mobility Support

For Veterinary Professionals Only

1 Clinically Proven Formula

Antinol[®]Plus (EAB-277[®]) is a joint and mobility support supplement that's backed by 2 in vivo double-blind controlled clinical studies. The primary active ingredient in Antinol[®]Plus, (PCSO-524[®] - Green-lipped mussel oil extract) is backed by 40 years of research and over 40 peer-reviewed studies.

2 Potent Ingredients

Made of a patented blend of green-lipped mussel oil and high-phospholipid krill oil not found in any other product. Together their synergistic properties promote joint health and support a healthy inflammatory response.

3 Pure Quality

Made with natural and sustainably sourced green-lipped mussels from New Zealand and krill from the nutrient-rich waters around Antarctica. Every batch is tested for purity, and free from harmful levels of pathogens, heavy metals, and PCBs.

Pure. Potent. Proven.

The Antinol[®]Plus Difference

Powerful marine oil blend not found in any other product

Works better and faster than glucosamine and chondroitin

Small, easy-to-eat soft gel

Antinol[®]+

Clinically Proven Formula

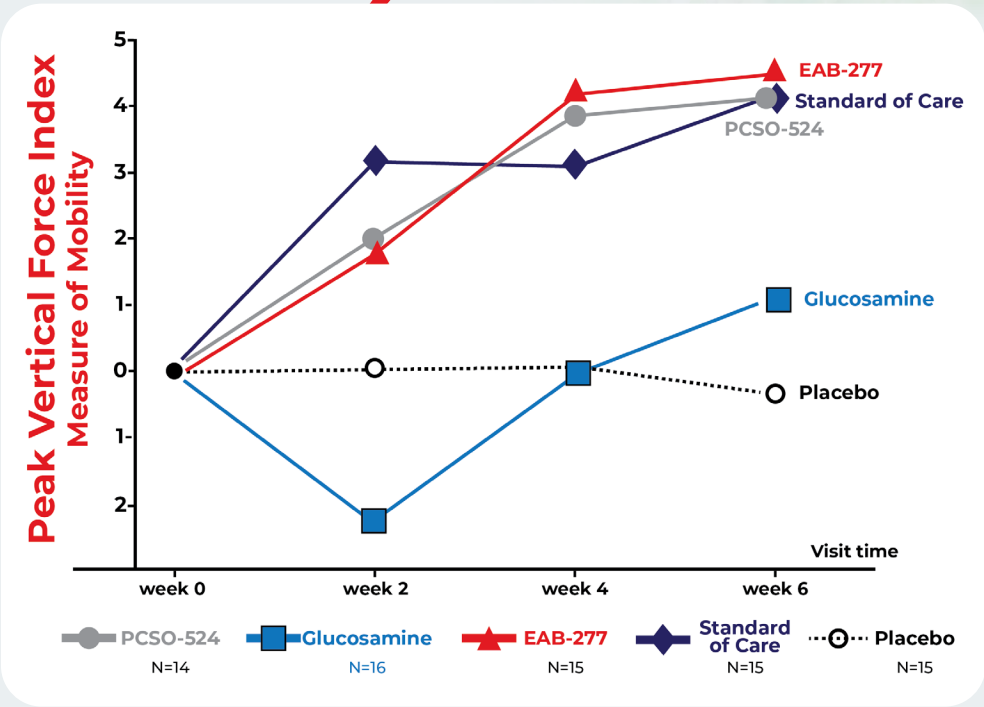

Meaningful Impact on Mobility

A clinical trial has confirmed that Antinol® Plus works better and faster than glucosamine and chondroitin and works as well as a standard of care at enhancing mobility in dogs with osteoarthritis.

Dogs diagnosed with osteoarthritis showed statistically significant improvements in peak vertical force (PVF) index after 4 and 6 weeks of treatment as compared to placebo.

The effectiveness of EAB-277® was equivalent to the standard of care after 6 weeks of treatment.

Notice a difference in as little as **4-weeks**

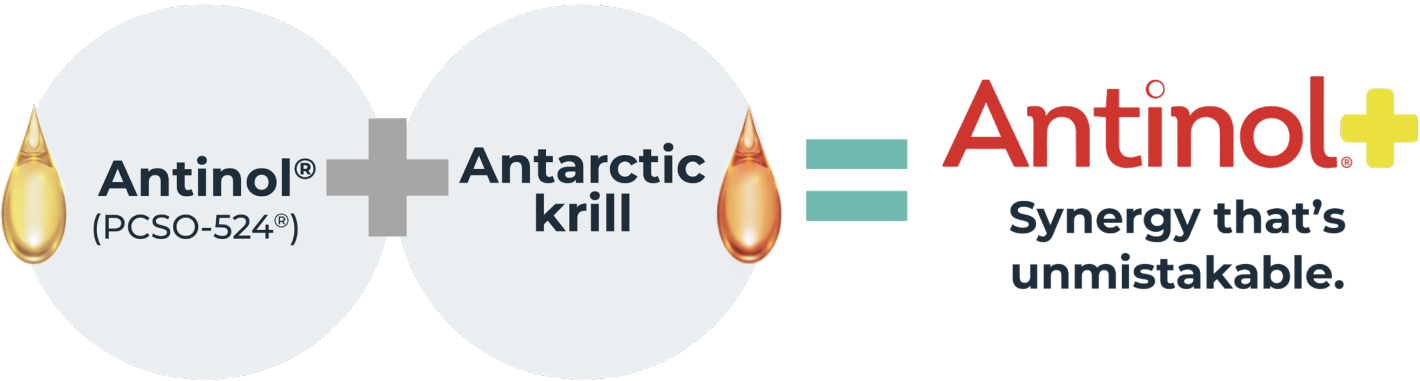

Front. Vet. Sci. 10:1033188. doi: 10.3389/fvets.2023.1033188

Potent Ingredients

Independently Powerful,
Even Better Together.

Green-lipped mussel oil and Antarctic krill oil work **synergistically**. Cell based in-vitro assays have shown that the ratio of PCSO-524® and krill in Antinol®Plus **work synergistically to inhibit** the production of **inflammatory markers** such as NO, TNF-A, and IL-6.

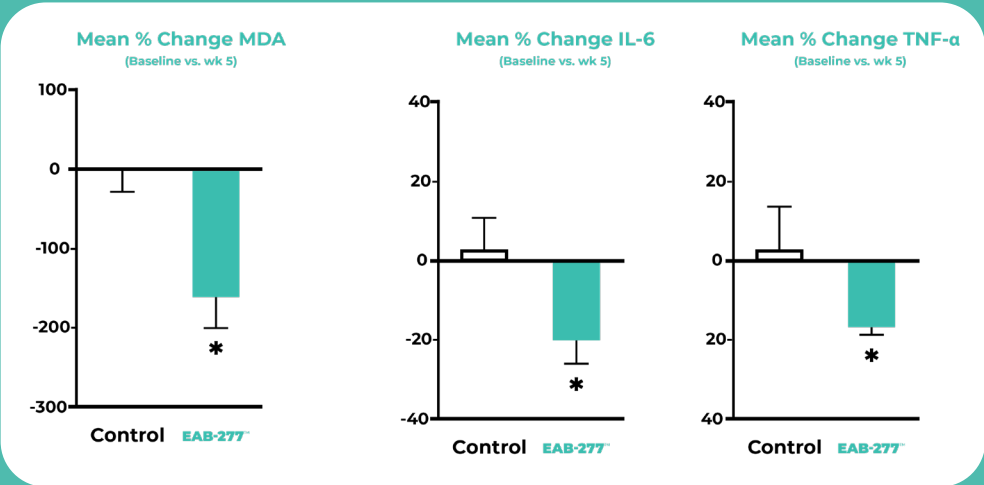

When combined, they deliver a powerful one-two punch of potent antioxidants and beneficial fatty acids in a **bioavailable** form. Packed with a potent combination of omega-3s such as EPA, DHA, DPA and naturally occurring astaxanthin.

Supports a Healthy Inflammatory Response

Clinical research has shown that Antinol® Plus reduces inflammatory markers and oxidative stress in dogs with tracheal collapse.

Vet. Sci. 10:1033188. doi: 10.3389/fvets.2023.1033188

Backed by Green-Lipped Mussel Oil

Not all green-lipped mussels are created equally. Antinol® Plus has the power of green-lipped mussel oil.

- 1 Most green-lipped mussel products are made of green-lipped mussel powder. Green-lipped mussel powder is in some cases a waste product of oil production.
- 2 If a product is in chew form, it's likely made from green-lipped mussel powder.
- 3 Powder is mainly glucosamine and chondroitin. Antinol® Plus is clinically proven to work better and faster than this combination.

Pure Quality

- 1** Antinol®Plus is made of natural and sustainably sourced Green-lipped mussel oil from New Zealand and Krill from the nutrient-rich waters around Antarctica.
- 2** Each mussel filters 25 gallons of antioxidant-rich plankton daily for 18 months to produce a unique blend of over 90 natural fatty acids, plant sterols and lipid mediators.
- 3** Green-lipped mussels and Antarctic Krill are also filter feeders– they consume microscopic plants and animals that are rich in nutrients, such as astaxanthin and choline. Because of that, biomagnification of toxic chemicals seen in marine organisms higher up on the food chain is not of concern.

CHECKING ALL THE BOXES

- ✓ Independent third-party analysis by ISO-certified laboratories
- ✓ Heavy metal screen for arsenic, lead, cadmium, and mercury
- ✓ Microbial screen for pathogens
- ✓ Pesticide screen
- ✓ Supported by 4 decades of research including randomized, controlled trials
- ✓ No documented adverse events

PROUD TO CARRY A QUALITY SEAL FROM THE NATIONAL ANIMAL SUPPLEMENT COUNCIL

The NASC Quality Seal identifies products that are compliant with the following criteria:

- Quality control manuals in place
- Adverse event reporting system in place
- Stringent labeling guidelines
- Submit to random product testing by an independent lab
- Participate in mandatory annual trainings facilitated by NASC
- Pass a biennial audit
